PROFESSIONAL EXPERIENCE

Freelance IT Web Designer/Technician (On-call only)

08/2024 – Present

- Provided on-call technical support and troubleshooting for hardware, software, and network issues across diverse client environments. Installed, configured, and maintained desktops, laptops, printers, and peripheral devices to ensure optimal functionality. Set up and managed small-scale LAN/WAN networks, routers, and wireless access points for home and small business clients. Performed system upgrades, OS installations, and data migrations, ensuring minimal downtime and data integrity. Implemented basic cybersecurity measures, including firewalls, antivirus software, and secure remote access solutions.
- Delivered technical consultations and training to clients, empowering them to use systems effectively and securely. Documented all work performed, providing clients with clear reports and recommendations for long-term IT maintenance.
- Designed, developed, and maintained responsive websites tailored to client requirements using HTML, CSS, JavaScript, and CMS platforms (e.g., WordPress, Wix, Squarespace). Created visually appealing layouts and user interfaces, ensuring an optimal user experience (UX) across desktop and mobile devices. Collaborated with clients to gather requirements, define project scope, and deliver solutions aligned with their brand identity and business goals. Provided website maintenance, updates, and security monitoring to ensure ongoing functionality and protection against vulnerabilities.
